THE REGISTER

The Heritage at Risk Register includes historic buildings and sites at risk of being lost through neglect, decay or deterioration.

It includes all types of designated heritage assets, including Conservation Areas, which are designated and assessed by Local Planning Authorities.

The aim of the Register is to focus attention on those places in greatest need. Historic England, in partnership with others, is able to help tackle heritage at risk. We work with owners, friends groups, developers and other stakeholders to find imaginative solutions for historic places and sites at risk across England.

More information about our role, the advice and funding available, and useful [publications](#) and [guidance](#) is available on our [website](#).

Criteria for inclusion on the Register

RISK ASSESSMENTS

Heritage assets included on the Register are assessed according to the nature of the site. The risk assessment methodologies outlined below are based on factors which can threaten the different types of heritage assets and lead to them becoming at risk.

BUILDINGS AND STRUCTURES

To be considered for inclusion on the Register, buildings or structures must be:

- listed on the National Heritage List for England; and
- in secular (non-worship) use.

And either:

- a grade I or II* listed building, or
- a grade II listed building in London, or
- a structural scheduled monument with upstanding remains.

Buildings or structures are assessed on the basis of condition and, where applicable, occupancy (or use) reflecting the fact that a building which is occupied is generally less vulnerable than one that is not.

Occupancy (or use) is assessed as 'vacant', 'part-occupied', 'occupied', 'not applicable', or occasionally, 'unknown'.

Many structures fall into the 'not applicable' category, for example: ruins, walls, gates, headstones or boundary stones.

Condition is assessed as 'very bad', 'poor', 'fair' or 'good'. The condition of buildings or structures on the Register is typically very bad or poor, but can be fair or, very occasionally, good. This reflects the fact that some buildings or structures are vulnerable because they are empty, underused or face redundancy without a new use to secure their future. Assessing vulnerability in the case of buildings in fair condition necessarily involves judgement and discretion. A few buildings remain on the Register in good condition, having been repaired or mothballed, but still awaiting a new use or occupancy.

Buildings or structures are removed from the Register when they are fully repaired/consolidated, and their future secured either through occupation and use, or through the adoption of appropriate management.

PLACES OF WORSHIP

To be considered for inclusion on the Register, places of worship must be listed grade I, grade II* or grade II on the National Heritage List for England, and be used as a public place of worship at least six times a year.

Places of worship are assessed on the basis of condition only. If a place of worship is in very bad or poor condition, it is added to the Register. This includes places of worship which are generally in fair or good condition but have major problems with one key element, like the tower.

Once on the Register, places of worship can move through the condition categories (e.g. from very bad to poor, to fair, even good) as repairs are implemented and the condition improves, until they are fully repaired and can be removed from the Register. This means that there are some places of worship in good condition on the Register but with outstanding issues still to be resolved at the time when they were assessed.

ARCHAEOLOGY

To be considered for inclusion on the Register, archaeological sites must be listed as scheduled monuments and included on the National Heritage List for England.

Archaeology assessments cover scheduled earthworks and buried archaeology.

The risk assessment is based on their condition and vulnerability, the trend in their condition, and their likely future vulnerability. A site's condition is expressed in terms of the scale and severity of adverse effects on it, ranging from 'extensive significant problems' to 'minor localised problems'.

Archaeological entries are removed from the Register once sufficient progress has been made to address the identified issues, and a significant reduction in the level of risk has been demonstrated.

PARKS AND GARDENS

To be considered for inclusion on the Register, parks and gardens must be listed as grade I, grade II* or grade II and included on the National Heritage List for England. Parks and gardens are assessed in terms of condition and vulnerability. Steps being taken by owners to address problems are also taken into consideration.

Parks and gardens assessed as being at risk are typically affected by development and neglect. They have frequently been altered by development or are faced with major change. The original function of these landscapes has often changed and divided ownership leads to the loss of their cohesive historic design.

Park and garden entries are removed from the Register once steps have been taken to address issues and positive progress is being made.

BATTLEFIELDS

To be considered for inclusion on the Register, battlefields must be listed and included on the National Heritage List for England. Battlefields deemed to be at risk of loss of cultural significance are included on the Register.

The principal risks and threats are:

- development pressure e.g. encroachment of buildings;
- pressures of particular use within the site e.g. arable cultivation;
- damage e.g. unregulated metal detecting.

Battlefields are removed from the Register either when damaging activities cease/are managed, or when threats recede due to effective planning.

WRECK SITES

To be considered for inclusion on the Register, wrecks must be listed and included on the National Heritage List for England.

Wreck sites are assessed based on their current condition, vulnerability and the way they are being managed.

Wrecks are vulnerable to both environmental and human impacts. Risks that contribute to inclusion on the Register range from unauthorised access to erosion and fishing damage. The monitoring process ensures that the significance of the site is identified and maintained. In spite of the inherent difficulties in caring for this type of site, careful management must be maintained.

Wrecks are removed from the Register once an appropriate management and monitoring regime is operational.

CONSERVATION AREAS

Once a year Historic England asks every local authority in England to consider the state of its conservation areas and fill in (and update as appropriate) risk assessment questionnaires for those that cause concern, or are believed to no longer be at risk.

Conservation areas that are deteriorating, or are in very bad or poor condition and not expected to change significantly in the next three years, are defined as being at risk.

The approach taken to assess conservation areas at risk has been refined since the first survey in 2008/2009. An overall category for condition, vulnerability and trend is included for each conservation area on the Heritage at Risk Register. Conservation areas identified as at risk in 2009, but not reassessed since using the revised methodology, are included on the Register but with limited information.

Conservation areas are removed from the Register once plans have been put in place to address the issues that led to the conservation area being at risk, and once positive progress is being made.

THE EFFECT OF COVID-19 ON THE COLLECTION AND COLLATION OF THE STATISTICS USED FOR THE 2020 REGISTERS

The collection of this year's data has been affected by Covid-19. From the onset of 'lockdown' site visits were not possible for either our staff or local authority colleagues, meaning that the usual level of on-site checking of existing or proposed entries on/for the Register was not possible for that period. However, desk-based assessments and updates were carried out.

Key statistics

BUILDINGS AND STRUCTURES

- Nationally, 766 (3.4%) out of a total of 22,485 grade I and II* listed buildings (excluding places of worship) are on the Register. In the East of England the percentage is 2.1% (71 listed secular buildings).
- In addition to this, of the 1,754 scheduled monuments in the East of England, 37 (2.1%) structural scheduled monuments are on the Register.
- 3 building or structure entries (including structural scheduled monuments) have been removed from the 2019 East of England Register because their futures have been secured, and 5 have been added.

PLACES OF WORSHIP

- Of the 14,788 listed places of worship in England, 932 (6.3%) are on the Register. In the East of England 116 (5.0%) are on the Register.
- 12 places of worship have been removed from the 2019 East of England Register following repair work, and 22 have been added.

ARCHAEOLOGY

- Of the 19,895 scheduled monuments in England, 2,090 (10.5%) are on the Register assessed as archaeology. Of the 1,754 archaeological scheduled monuments in the East of England, 114 (6.5%) are on the Register.
- 9 archaeology entries have been removed from the 2019 East of England Register for positive reasons, and one has been added.

PARKS AND GARDENS

- Of the 1,670 registered parks and gardens in England 103 (6.2%) are on the Register. Of the 218 registered parks and gardens in the East of England, 8 (3.7%) are on the Register.

- No park and garden entries were added to or removed from the 2019 East of England Register in the past year.

BATTLEFIELDS

- Of the 47 registered battlefields in England, 3 (6.4%) are on the Register. The one registered battlefield in the East of England is not on the Register.

WRECK SITES

- Of the 54 protected wreck sites around England's coast, 3 (5.6%) are on the Register. The two protected wreck sites in the East of England are not on the Register.

CONSERVATION AREAS

- There are currently 491 conservation areas on the Register. Of these, 49 are in the East of England.
- No conservation areas have been removed from the 2019 East of England Register for positive reasons and one has been added.

HISTORIC ENGLAND FUNDING

- £1.77 million in grant was spent on 36 entries on the East of England Register during 2019/20.

Risk assessments of heritage assets are based on the nature of the site. Buildings and structures include structural scheduled monuments and listed buildings (excluding listed places of worship); archaeology assessments include earthworks and buried archaeology. Please note that some sites may have more than one entry under different risk assessment methodologies, for example if a site has more than one listing for its different elements or if it consists of buried and structural remains.

Key to the entries

The Register includes the following risk assessment types:

- Building or structure
(grade I and II* listed buildings, grade II listed buildings in London and structural scheduled monuments)
- Place of worship
(grade I, II* and II listed buildings)
- Archaeology
(scheduled monuments – earthworks and buried archaeology)
- Park and garden
(Registered parks and gardens)
- Battlefield
(Registered battlefields)
- Wreck site
(Protected wreck sites)
- Conservation area
(Conservation areas)

Details are given here for all risk assessment types even if entries are not present in the Regional Register.

ORDER

Entries are grouped and ordered alphabetically, first by County (dark grey bands) or Unitary Authority (light grey bands), and then by Local Planning Authority (National Park/Unitary Authority/District or Borough).

A blank band denotes the end of a county and the beginning of a unitary authority.

Sites that straddle more than one local planning authority are included under the lead authority.

Within each planning authority, entries are grouped by risk assessment type in the following order:

- Buildings or structures
- Places of worship
- Archaeology
- Parks and gardens
- Battlefields
- Wreck sites
- Conservation areas

Within each risk assessment type, entries are ordered alphabetically by parish, locality and street/site name (except for conservation areas and protected wreck sites which are ordered by site name only).

LISTING

The principal listing type is noted for each entry and includes:

- Listed Building (LB) grade I or II*
- Listed Place of Worship grade I, II* or II
- Scheduled Monument (SM)
- Registered Park and Garden (RPG) grade I, II* or II
- Registered Battlefield (RB)
- Protected Wreck Site (PWS)
- Conservation Area (CA)

Other listing types that apply to a given site, including location within a World Heritage Site (WHS), are also noted.

If an entry is a dual list entry (both listed and scheduled), 'and' rather than a comma is used (eg 'Scheduled Monument and Listed Building grade I'). If a scheduled monument entry is a dual list entry with a number of listed buildings, each is separated by a semicolon.

The National Heritage List Entry Number is included for all entries (except conservation areas). If a site has dual list entries, all relevant List Entry Numbers are noted.

CONDITION

For buildings (including places of worship), condition is graded as: 'very bad', 'poor', 'fair' and 'good'.

For sites that cover areas (scheduled monuments – archaeology assessments, parks and gardens, battlefields and wreck sites) one overall condition category is recorded. The category may relate only to the part of the site or monument that is at risk and not the whole site:

- extensive significant problems
- generally unsatisfactory with major localised problems
- generally satisfactory but with significant localised problems
- generally satisfactory but with minor localised problems
- optimal
- unknown (noted for a number of scheduled monuments that are below-ground and where their condition cannot be established)

For conservation areas, condition is categorised as: 'very bad', 'poor', 'fair' and 'optimal'.

If a site has suffered from heritage crime it is noted in the summary. Heritage crime is defined as any offence which harms the heritage asset or its setting and includes arson, graffiti, lead theft and vandalism.

OCCUPANCY/USE

For buildings (excluding places of worship) that can be occupied or have a use, the main vulnerability is vacancy or under-use. Occupancy (or use) is noted as follows:

- vacant
- part occupied
- occupied
- unknown
- not applicable

VULNERABILITY

Principal vulnerability is noted for archaeology assessments and may relate only to the part of the site that is at risk, and include:

- animal burrowing
- arable ploughing
- coastal erosion
- collapse
- deterioration – in need of management
- scrub/tree growth
- visitor erosion

For parks and gardens, battlefields, wreck sites and conservation areas, vulnerability is noted as high, medium or low.

PRIORITY CATEGORY

Priority for action is assessed on a scale of A to F, where 'A' is the highest priority for a site which is deteriorating rapidly with no solution to secure its future, and 'F' is the lowest priority.

For buildings and structures and places of worship the following priority categories are used as an indication of trend and as a means of prioritising action:

- A Immediate risk of further rapid deterioration or loss of fabric; no solution agreed
- B Immediate risk of further rapid deterioration or loss of fabric; solution agreed but not yet implemented
- C Slow decay; no solution agreed
- D Slow decay; solution agreed but not yet implemented
- E Under repair or in fair to good repair, but no user identified; or under threat of vacancy with no obvious new user (applicable only to buildings capable of beneficial use)
- F Repair scheme in progress and (where applicable) end use or user identified; or functionally redundant buildings with new use agreed but not yet implemented

For battlefields and wreck sites the following priority categories are used as a means of prioritising action:

- A No action/strategy identified or agreed (where trend is declining or unknown)
- B Action/strategy agreed but not yet implemented (where trend is declining or unknown)
- C No action/strategy identified or agreed (where trend is stable or improving)
- D Action/strategy agreed but not yet implemented (where trend is stable or improving)
- E Monitoring as appropriate (any trend)
- F Action implemented/strategy underway/scheme in progress (any trend)

Previous year priority categories are given in brackets, otherwise 'New entry' is noted.

'New entry – re-assessed' indicates an existing site on the Register that has been re-assessed using a different risk assessment methodology and is included on this year's Register under the new assessment type.

TREND

Trend for archaeology entries, parks and gardens, battlefields and wreck sites may relate only to the part of the site that is at risk and is categorised as:

- declining
- stable
- improving
- unknown

For conservation areas trend is categorised as:

- deteriorating
- deteriorating significantly
- no significant change
- improving
- improving significantly
- unknown

OWNERSHIP

A principal ownership category is given for each entry, and if sites are in divided ownership, a 'multiple' ownership category is noted.

CONTACT

This is the member of the Historic England local team who acts as a first point of contact for the case, and to whom enquiries should be addressed.

For conservation areas, the contact is the conservation/planning officer at the relevant local planning authority (indicated by 'LPA').

We are not in any sense agents for the owners of the sites included, but we will endeavour to put people in touch with them where appropriate.

SITE NAME:	Church of St Martin, Clapham Road, Bedford
DESIGNATION:	Listed Place of Worship grade II, CA
CONDITION:	Very bad
PRIORITY CATEGORY:	A (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	I390539

Church of 1888-9 by JA Chatwin of Birmingham, in Gothic style. A large urban church of yellow brick with red brick banding; stone copings to gable. Four bay nave and arcades; shallow transepts; Lady Chapel; polygonal apse and east baptistery. North vestry and ancillary rooms; church hall to south. Movement on north side of church now largely ceased and some cracks closed up following tree removal. Vestry movement more severe. Architect and Structural Engineer advising Parish.

SITE NAME:	Church St Mary the Virgin, Church Road, Keysoe, Bolnhurst and Keysoe
DESIGNATION:	Listed Place of Worship grade I
CONDITION:	Poor
PRIORITY CATEGORY:	A (A)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	I114778

The oldest part of church dates from C12 with the north aisle and south porch added in C14. North chapel, tower and spire C15. Stone is falling from the tower; possible structural instability. Lengthy inspection and 'first aid' on tower and spire in 2018 led to a substantial amount of loose render and a dangerous gargoyle head was removed, leaning south parapet. Parish considering obtaining further professional advice.

LIST ENTRY NUMBER:	I114867

Early C15 with window tracery re-worked in C19. Chancel of cobblestone but coursed freestone everywhere else. Chancel, north vestry, nave, south porch and west tower with broach spire which dominates the surrounding countryside. Nave roof covering has failed in spite of repeated patching and requires urgent replacement to protect late medieval carvings incorporated into roof beneath and medieval walls. Parapets slender and loose especially on north and east elevations but maybe elsewhere. Vestry roof leaks. Excessively damp internally.

The pumping station was built in 1894 to house two Hathorn Davey steam engines and pumps to pump the town's sewage to the treatment works two miles away. Household rubbish was burned as boiler fuel to raise the steam to drive the engines. The site ran under steam, gas and electricity before closing in 1968. It is now the Cambridge Museum of Technology. In 2016 the National Lottery Heritage Fund awarded a grant towards the further development of the Museum. Historic England grant aided the first stage of internal repairs and funded a report to investigate the condition of further elements.

Minster church dating from 1180-90, of cruciform plan. Extended in C15 by one bay to the west when the tall four-stage west tower was built. Constructed of limestone, rubble and pebble stone with flint. Clunch and limestone internally. Restoration in Ketton stone. Nave roof with C15 tie beams on jack-posts. Wall paintings in chancel. The tower has been cordoned off due to loose masonry. The church suffers extensively from damp. One of the first purpose-designed museums in England, 1846-7, and an important feature in Wisbech. Neoclassical style, with gault brickwork and slate roofs. The original display cases, bookcases, and decoration survive. Roofs in very poor condition, with leakage now causing serious damage to internal plasterwork and details. With a Historic England grant, project development for the repair project is complete and emergency repairs will be carried out pending fund raising for the main work.

Parish church. Built of limestone with Barnack dressings, limestone and pebble rubble, originally plastered. Visible remains of C12 church at west end and in north aisle. Chancel rebuilt in C14 and nave enlarged. Extensive restoration 1885-6 by Mr Bassett-Smith. Issues include dangerous turret stair and pinnacle which overhangs public footpath; roof coverings over north and south aisles coming to the end of their serviceable life; and groundwater drainage issues. Parish received a National Lottery Heritage Fund project development grant in February 2019. Project on-going.

Large parish church of C12 or earlier origin, with a well-documented rebuilding of the early C17. Late C14 west tower, partly rebuilt on the north side after its partial collapse in 1607. The ridge beam of the tower roof has fractured as the result of water penetration. The roof structure has spread, endangering the surrounding walls and bell frame below, leading to the church being temporarily closed in summer 2018 for safety reasons. Part of the nave floor is also unsafe. Historic England Repair Grants for Heritage at Risk grant for emergency repairs, which are due to complete during 2020.

C18 house on site of Priory guesthouse with C13 medieval undercroft and some pre-Georgian cellars. The undercroft, built in Totternhoe stone, is subject to complex structural movement and dampness issues. Excess surface water remains a significant agent of decay undermining the Totternhoe stone foundations and front wall causing further instability. Historic England High Street Heritage Action Grant awarded and Priory House will be repaired as part of this scheme.

Medieval church of C13 origin with later additions and alterations. Rubble walls with later brick to both C18 tower and modern parapets. Internal damp; black mould on walls which were only re-limewashed some four years ago. Various possible causes of damp can be identified. The tower has received quite a lot of cementitious patch repairs, which is not a good combination with the soft clunch stone used for construction. Some structural movement. Parish have completed priority 1 actions from 2017 quinquennial inspection report; and developing plans to address priority 2 actions.

Parish church dating to C12 and half rebuilt 1875-6 by Sir Arthur Blomfield. Stonework of coursed ironstone with ashlar dressings and clay tile roofs. The clunch corner stones are decaying as well as the tracery to the south aisle chapel and vestry, render panels failing. High-level masonry problems and tower in need of repointing. Following a failed National Lottery Heritage Fund bid, the congregation have tendered for urgent interim repairs to the tower and transept roofs. Fund raising actively being explored with the aim to have work on site 2020-2021.

Parish church, originally part of the endowment of Warden Abbey. C12 origins, predominantly C13, with C14, C15 and C16 details, reworked mid and late C19. Mainly of brown cobblestones with limestone dressings, later works in red brick and coursed limestone. Interior: C16, C17 and C18 carved woodwork, apparently mainly Flemish and English, collected by Robert Henley 3rd Lord Ongley, installed 1841. All the roofs, except the Chancel roof covering, are in a poor state. A merlon on the south side of the Tower collapsed. Poor rainwater management. Dampness is putting the interior fittings at risk.

A timber-framed water mill with an integral dwelling thought to date to the mid-late C18. The mill building is little altered, and retains its water wheel, primary and secondary gearing and the great majority of its milling machinery. The water management system on the site is also unaltered making this ensemble of buildings, machinery and watercourses an extremely rare survival. Continuing concern over condition of mill. Mid C19 gardens created for the Bishops of Rochester, focussed on the early C19 Danbury Palace and set with a C16-C18 landscape park developed by the Mildmay, Fytche and Round families from an earlier medieval deer park. The site is divided between multiple owners, resulting in differential management, obstructed views and fragmentation of the designed landscape. Numerous features, such as the icehouse, ha-ha, lakes, and Lime Avenue are deteriorating. An historic landscape survey exists, but a shared vision and strategy for improved management across the whole site is required.

A technologically innovative building of 1935. Eighteen bays in length with steel hooped frames and longitudinal purlins. There is extensive evidence of steelwork corrosion and the roof and windows are deteriorating. Historic England Heritage at Risk Grant accepted in July 2018 and a project development phase to identify a suitable conservation strategy was successfully completed in 2019. Trials for repairs completed. Further more detailed evaluation required to establish most appropriate and viable conservation option.

Late C17 library built on the site of the church of St Peter now retaining only the West tower. The old church was granted to the Premonstratensian Canons in 1180. In 1690 Thomas Plume built the two-storey brick and timber library building which occupies the footprint of the nave to house his book collection of over 4,000 rare and important C16 and C17 texts. The lath and plaster ceiling over the library has lost its key in many places and is at risk of collapse. Evidence of possible structural movement and cracking in various parts of the building.

The last surviving timber trestle railway bridge in England. It comprises two adjoining viaducts, one crossing the River Blackwater, the second the Wickham Mill leat. The structures were part of the Braintree to Maldon branch line, built to carry freight and passengers inland from the port at Maldon. The line was operational between 1848 and 1966 although it closed to passenger traffic in 1964. Although there were extensive repairs in the 1990's, many timbers are suffering from rot and decay caused by damp, lack of maintenance and heavy tree growth across, and through, much of the monument.

One of 29 Martello towers originally built along the east coast 1808-12, against the threat of French invasion. Owned by Tendring District Council, but access is difficult because site sits partly within a private golf course. The forward battery was lost in the 1980s during construction of new sea defences. No internal access currently possible but the monument suffers from water ingress and loss of render. Historic England funded a feasibility study in 2015-6 to help Tendring District Council identify beneficial use and repair costs, and options are being reviewed.

C18 watermill, white weatherboarding over painted brick base. Beam engine of c1873 now gone but mill machinery intact. Mill disused since 1930s. Roofs leaking and building splitting apart. Front wall bulging and some of the weatherboarding is missing. These defects put the structure and the machinery inside at serious risk. Investigation and urgent works to 'mothball' the building, grant aided by Historic England, have been carried out. Final report to be reviewed with owner, his advisers and local planning authority as appropriate to determine a viable way forward.

Redoubt. 1808-1810. Of brick and granite. Circular plan form with internal courtyard and brick vaulted chambers. Designed as bomb-proof fortification with effective artillery power to withstand lengthy siege. Upper level contains batteries for ten 24-pounder cannon. Dry moat revetment in brick. Suffering effects of water ingress - significant loss of pointing to inner and outer moat walls, or cement pointing resulting in loss of brick facings. Internally there are significant signs of plant growth throughout, as a result of missing pointing and failing roof coverings.

Stone Hall dates back to the fourteenth century originally used as a religious retreat together with gardens and woods extending to 25 acres. The Countess of Warwick developed the garden and pleasure garden in the early C20. There is surviving ornamental planting as well the remains of a grotto at the pond/sunken area to the south of the Hall. Overall structural movement affecting the whole property is a matter for concern. Roofs are leaking locally and rainwater goods are in a poor state. Property is vacant; local planning authority and Historic England to discuss next steps with the owner.

Red brick tower windmill, built in 1804 for John Webb. A full survey with budget costs for repairs has recently been carried out. Extensive damp internally from eroded brickwork, open joints, causing widespread mould on internal walls, and deflection in one of the main floor beams with decaying ends housed in the brickwork. The Trust have installed temporary propping and are working to raise funds for an urgent first phase of work to restore structural integrity and excess moisture leakage through the walls. Historic England Heritage at Risk grant accepted towards enabling project in May 2020.

Watermill, early C18. Milling machinery intact. Evidence of major structural failure which is endangering interior features. The Local Authority served an Urgent Works Notice in 2018 to make the building wind and watertight. This has now been complied with, however a comprehensive programme of repairs is needed. Discussions continue between Historic England and the Local Authority in relation to the preparation of a full schedule of repairs and service of a Repairs Notice.

Church with probable C12 origins. Largely demolished and rebuilt in the 1860s. Constructed from flint rubble with stone dressings and a tile roof. Shingled spire showing signs of loss and curling of shingles; north transept (vestry) roof tiles are slipping. The latter are over a C15 roof structure with plastered ceiling and there is mould growth on the western part of the ceiling, which is indicative of a leaking roof. Patch repairs secured. Tiles slipping elsewhere. The parish have set up a subcommittee to advance the re-roofing project, which they hope will be followed by a spire project.

An unusually well preserved fourteenth century church, with some later work including the three-bay stone rood screen, built in imitation of the C14 original by Woodyer in 1884. Settlement in many areas of the nave and aisle flooring, due to continuing leaks of a post WWII under floor heating system. In some areas this is becoming a health and safety issue. It's also primarily responsible for the salt migration and decay of medieval fabric. C16 series of painted texts in the north aisle in urgent need of consolidation. Major scheme of repairs being developed.

Edwardian gardens designed by Harold Peto c1902, incorporating a late C17/early C18 grove. The house was fire damaged and finally demolished in 1950. Converted service buildings and infill development remain. Built structures within the garden have deteriorated, particularly the Italian Garden. Ownership split between private owners of houses and an investment company. Garden continues to open to public in a limited manner under the direction of the charity, The Gardens of Easton Lodge Preservation Trust. The majority landowner is producing a Conservation Management Plan with the Trust.

Knebworth House comprises the remains of a C16 courtyard house with a C19 Gothic style remodelling in cement render, now extensively deteriorated. Despite a continuing campaign of repairs with grants from Historic England, much work remains to be done. The most recent project was the 'Watchman's Tower' range, completed in 2019. Since then, serious structural failure has developed in one of the turrets of the main house, which will be the subject of a further grant application for project development.

A brick tower mill of 1818, now with reinstated cap and sails. Described in the Statutory List as being the largest diameter mill in England, driving five pairs of millstones with machinery that includes an unusually large crown wheel. There is extensive cracking and bulging of the brickwork, leakage in the cap and deterioration of timber in the crosstrees, the fantail and its frame. Project development to define a costed and phased programme of repairs has been completed with a grant from Historic England. We have now received a further grant application for the first phase of repairs.

Medieval town walls, just over a mile long with eleven surviving towers. Work started in 1276 and took more than a century to complete. Some of the masonry is in fair condition; other sections of upstanding town walls owned by the Borough Council, and areas in multiple separate ownership, are at risk from loss, particularly at high level. The Borough Council has secured a Historic England Repair Grants for Heritage at Risk grant to support a phased programme of repairs starting in summer 2018 and finishing in spring 2021. Work is on site.

Parish church founded in 1101 in association with adjacent Benedictine priory. Considered by Pevsner to be the largest parish church in England. Base of tower early C12, remainder C13; restored in C19. Extensively fire-damaged in World War II and rebuilt. Urgent repairs completed July 2013. Further urgent repairs are needed including to the central tower and the north transept buttress stonework; various other high-level stonework repairs are required. A Listed Places of Worship Roof Repairs Grant was awarded in 2016. Further work remains to be done and the parish are considering next steps.

Roman Catholic church, Perpendicular style with late decorated features, built 1848-1850 by JJ Scoles for the Society of Jesus. Built of knapped flint with limestone ashlar dressings. A jointly funded Historic England and National Lottery Heritage Fund Repair Grants for Places of Worship grant was awarded in 2011 to stabilise west end and re-roof presbytery link. These works are now complete but other urgent and wide-scale structural and weathering problems are of concern. The most urgent area is the chancel. Historic England to re-engage with Parish.

An early C14 parish church. Restored 1896. Flint with ashlar dressings and brick repairs. Plain tiles to nave and slate to chancel. Structural movement affecting the chancel is a matter for concern. The base of the Tower has been fenced off amid concerns of stonework falling off the south belfry opening. The mullion is missing and the tracery stonework is precarious. The Chancel roof covering is failing, high-level mortar joints are open, flintwork and buttresses are locally poor.

The gas works produced town gas from 1825 until 1965 and is now the only remaining town gas works of its kind in England. Acquired by a charity in 1983 and repaired, it was opened as a museum in 1989. Damp and ground movement are causing structural weakness to key industrial buildings and machinery. Corrosion of metalwork and metal components. Issues surrounding the condition and structural integrity of retort housing and adjacent chimney. Condition survey undertaken in January 2016 to inform future programme of repairs and consolidation. Historic England are liaising with the Trustees.

Vineries of 1718 by Samuel Wyatt. Gault brick with Coade stone embellishments. Slate roof. Large lean-to glasshouse on south side; principal facade on the north comprising two storeys of seven bays. The roof slates are laid at too slack a pitch and the gutters are inadequate, causing water ingress and timber rot. Part of the roof to the vineries has collapsed due to structural failure. Urgent repairs are required. Work planned to commence on site late 2020.

The church dates from the C14 to C15 with a distinctive west tower of that period (a compressed octagon on plan). The roof, roof structure, and walls of the tower at high level are in poor condition, as are the rainwater goods and ground drainage to the rest of the church, resulting in widespread leakage and damp conditions internally. A National Lottery Heritage Fund Grants for Places of Worship grant was awarded in 2017. The project completed the development stage but was unsuccessful in gaining a grant for the repairs.

Early C18 park and woodland designed as collaboration between Thomas Ripley, Charles Bridgeman and Horatio Walpole, surrounding an early C18 Palladian mansion with mid-C19 gardens laid out by William Sawrey Gilpin. Some parts of the park are in arable use and other parts are in pasture. There has been loss of definition of lake margins. Built structures are in very poor condition, with the Peach House in the kitchen garden in a particularly vulnerable state. The site is in single private ownership and a Parkland Management Plan is now informing on-going maintenance and restoration.

LIST ENTRY NUMBER:	1304627

C13 and C15 church, tower with Saxon fabric, chancel of 1869. Declared redundant in 1985 and fell into very poor condition throughout, but has subsequently been returned to use for worship and community activities, winning a Historic England Angel Award in 2015. A first phase of repairs to the nave and chancel, funded by a National Lottery Heritage Fund Grants for Places of Worship grant, has been completed. In 2017, a further application for the masonry and roofs of the tower and north porch was successful and is anticipated to complete by summer 2020.

LIST ENTRY NUMBER:	1169126

Parish church. C11 with C13 and C15 re-modelling. Round west tower, probably late C11, divided into stages by three stone bands. North west bay of chancel has C15 two-light window flanked by blocked circular openings. North aisle has two-light C13 'Y' tracery windows and, at north-west corner, north doorway with billet hood mould and shaft, scallop and roll-moulded arches. Widespread damage from damp caused by inadequate disposal of rainwater is leading to deterioration of internal fabric and structural problems in external walls.

Parish church dating to the C15, restored and re-roofed in the 1960s. Constructed from flint with ashlar and brick dressings. Pantile roof. Although re-roofed in the 1960s, there are a number of slipped tiles on the south slope and heavy moss to the north, alongside blocked gutters. The rainwater goods are in a poor condition throughout. Pigeons in the tower may also be causing damage.

Set on slightly rising ground to one end of the village, the church is constructed of coursed stone and ashlar under metal and slated roofs. C12 tower with early C15 top; C12 nave with C15 clerestory. C13 aisles and C12 tower arch. Significant moisture ingress around the tower arch doubtless due to defective roof coverings and flashings above. Rafter feet in very poor condition. On-going dampness in the north aisle including salt-affected plaster at west end of nave. South aisle roof leaking in places.

St Pega's church. Pega belonged to one of the great noble families of Mercia and sister of St Guthlac, founder of Crowland Abbey. Pega lived as an anchoress at Peakirk, a village constructed largely from limestone but situated on the edge of the fens. The church contains traces of eleventh century work but dates principally from the twelfth century, comprising a nave, chancel, north and south aisles; chapel and a south porch. Contains a fine and extensive set of fourteenth-century wallpaintings. Following heritage crime, a scheme is underway to raise funds to repair the roofs.

House, 1681. Currently vacant, last used as residential quarters. Re-use of the building is complicated by its location within a military site. A serious dry rot problem was treated 1998 to 2003 but has caused considerable damage to the interior. The building has been vacant for many years. Rigid application of three-year break clause in all long leases granted by Ministry of Defence has seriously worsened potential for reuse by charitable trusts. On-going water ingress due to defective rainwater goods.

Church dating from the C14, prominently situated in the Cavendish Conservation Area at the east end of the green. Unusual features include the vaulted parvise and external arched timber bell cage and flagpole combined, which sits on the tower parapet. There is some deterioration of masonry on the tower. The flagpole has begun to lean, possibly because the plated joint at low level is becoming ineffective.

A grade II* church of C12 origins, extended in the C19. Roofs reslated 2013 supported by Historic England grant. 2014 Quinquennial noted the appearance of cracks at East end of chancel which appear to have become worse such that the chancel East window, buttresses and gable end is at risk. Scheme of remedial work being developed. A Minor Repair Grant from the Taylor Review Pilot was received in 2019 to help with roof repairs, rainwater goods repairs, drainage and window repairs.

Largely C14, restored 1846-7 by Cottingham and again in 1888-9. Nave, chancel, south porch and west tower constructed mainly in flint rubble with plain freestone dressings. Hammerbeam nave roof structure, possibly C17. Roof coverings of plain tiles, with parapets. C15 south porch and five-stage tower. Nave roof truss has failed; the tie bars do not appear to have arrested movement. Major roof repairs required. Window in chancel has been supported and blocked to stop the stained glass from blowing out and structural collapse. Architect investigating sources of grants with the congregation.

Meeting House 1699 for congregation of Dissenters founded in 1672. Much original work and original interior fittings intact. Square plan with plastered walls and galleries. Mid C20 external render has created conditions for decay of original timber panelling, fittings and joinery. Roofs in deteriorating condition. Repair work has started on site with Historic England grant support to help re-tile roofs, stabilise timber framing, repair and conserve the windows and renewal of render. A Minor Repair Grant from the Taylor Review Pilot was received in 2019 to replace the central valley gutter.

Extensive mid-C19 Italianate garden by Charles Barry set in C17 park, for which Humphry Repton prepared a Red Book in 1789 and William Woods in 1808. Many proposals have been implemented in the expanded park. The site is in divided ownership following sale in 2009 and boundary fences erected. Management of Old Hall landscape is improving but the built garden features and planting are significantly decayed. Improved management strategies for the park as a whole need to be developed to safeguard its future.

LIST ENTRY NUMBER:	1006055

Substantial remains of a medieval castle and college of canons. The site is in various ownerships. Repairs completed with grants from Historic England in 2009 to the keep and part of curtain wall, and in 2018 to a freestanding structure within the walls. However, further repairs to the gatehouse and the rest of the curtain wall are still urgently needed.

Remains of a Cistercian abbey built in 1150. A Countryside Stewardship agreement enabled the abbey meadow to be brought into appropriate management and part funded repair and consolidation of the bridge in 2018/19. A first phase of work focussed on the monks' refectory was completed in June 2019 with further support from the owners and Historic England through a Repair Grants for Heritage at Risk grant. A second phase of work focussing on remaining structures of the south range of the cloister is anticipated in 2019/20.

DESIGNATION:	Listed Place of Worship grade II
CONDITION:	Poor
PRIORITY CATEGORY:	C (C)
OWNER TYPE:	Religious organisation
LIST ENTRY NUMBER:	1377186

Parish church with ruinous west tower. Chancel rebuilt in 1862 and the nave restored in 1864. The condition of the drainage and guttering is unclear; however, there is significant evidence of damp within the church interior. The ruinous tower is blocked off from the nave and is overgrown by trees and shrubs. Slow decay continues; no solution yet agreed for either the church or the ruinous tower. Ivy growth partially killed off; some work appears to have been completed. Review required.

LIST ENTRY NUMBER:	1032100

Parish church. C12 doorways. The lower portion of the tower is possibly medieval; remainder entirely rebuilt 1849-50 in neo-Norman style. The tower is of flint rubble, the bell-chamber stage faced with knapped flint; the nave and chancel are plastered; stone dressings. Slated roofs with courses of fish-scale slates. Poor construction in C19 has resulted in serious structural failures in masonry, particularly the south nave wall, and water penetration. Roof poor; interior fair; rainwater goods satisfactory.

LIST ENTRY NUMBER:	1032081

St Andrew's Mutford consists of a nave, rebuilt in the Late Medieval period but still evidently incorporating some Norman fabric in the lower portion of the wall. C14 chancel and south aisle, the 1891 south porch, the possibly C14 galilee porch and the Saxo-Norman round tower, altered in the C13 and then C14y, when the octagonal bell stage was added - the tallest round tower in Suffolk. It is also thought to be a unique combination of a round tower and a galilee porch. Tower masonry in urgent need of consolidation; roof to Galilee porch leaking; drainage issues.

Church and presbytery 1912-16 by Catholic architect Fr. Benedict Williamson. Largely Romanesque style. Oriented north-south with nave and sacristy, with tower above. There has been significant corrosion of the steel beams in the tower roof and elsewhere. The tower parapet has 'lifted' as a result of corroding internal steel. The tower roof slab and turret stair are potentially unsafe. National Heritage Lottery Fund grant delivery phase underway. Historic England Taylor Review Pilot grant awarded March 2019 for urgent rainwater goods repairs which will complete late 2020.

SITE NAME:	Bawdsey Manor, Bawdsey	Elaborate gardens laid out between 1885 and 1909 for Sir Cuthbert and Lady Quilter on advice from Alfred Parsons. The site contains numerous garden features built by James Pulham and Son in the 1890s, including an extensive artificial cliff garden complete with seats and alcoves. The Pulhamite features require conservation, and both gardens and park are in need of strategic management. Coastal erosion remains a major concern, with planned works to repair sea defences. Restoration of some features will continue to come forward alongside redevelopment of the site as an outdoor education centre.

SITE NAME:	State Cinema, George Street, Grays	The State Cinema is one of the best preserved of the 'super cinemas' of the late 1930s. It was constructed in 1938 by FGM Chancellor for Frederick's Electric Theatres. The building has suffered from heritage crime and the roof, rainwater goods and interior are in poor condition. The reuse of the vast cinema poses complex problems, as confirmed by a feasibility study some years ago. Planning and Listed Building Consent approval were granted in 2018 for conversion to public house. Works commenced in 2019 but have stalled due to the submission of an amended application in 2020.

C18 landscape park laid out for Lord Dacre by Lancelot 'Capability' Brown between 1753 and 1763, incorporating C17 and early C18 elements with later additions by Richard Woods in 1770. The house was demolished in 1957 and the M25 motorway cuts through the eastern park, and surviving features including Brown's shrubbery and Woods' Long Pond are in very poor condition. The site is now divided amongst multiple public and private owners, supporting a golf course and other formal and informal recreational uses. The whole landscape requires a shared vision and strategy for improved management.
