ANCIENT MONUMENTS LABORATORY

MATERIAL ORGANIC etc.

SITE: WALTHAM ABBEY (DATE: 19/7/79)

SHEET: 1

AM No	X-Ray No	Photo No	Description and Report	Ref No
7715025(/7)	Fibre backing bezel		<p>The sample was examined in the scanning electron microscope. It was seen to consist of a group of fibres, slightly twisted. They are fine (<u>c</u>10 microns in diameter). Ridges occur around the fibres at intervals, resembling a coronal scale pattern of animal hair. It was felt, however, that the fibres were more likely to be of vegetable origin.</p> <p>Micrographs (Taken by C. Brooke) may be examined at the A.M.L.</p> <p>Micrograph nos: -199-204</p> <p>Stub no.: -186</p>	
7715025/7	From decayed bronze ring.		<p>The sample was examined in the S.E.M. It was found to be fibrous, but was unidentifiable. It could be wood.</p> <p>Micrograph nos: -P246-249</p>
