

Radiocarbon samples from Ribchester, Lancs.

Carole A. Keepax

Samples were identified by the examination of cross-sectional fractures under low power magnifications. They were not checked by the observation of other sections at higher magnifications.

RB80 068 "From primary vessel"

Oak (Quercus sp.) from mature timbers

RB80 057 SF37 "Charcoal and bone contents"

Hazel or Alder (Corylus/Alnus sp.) from mature timbers

RB80 068 "From secondary vessel"

Oak from mature timbers

RB80 067 SF63

Oak and Hazel/Alder from mature timbers
