

AMH Rep. 14008.

Sent to P. Gaudin

78

30/8/83

Castle Acre Priory : Animal Remains from site 78.

819833 71

Gadoid fish

Caudal vertebra

819834 160

Pig (Sus sp. domestic)

Upper right canine tooth, worn and chipped.

819835 406

Sheep (Ovis sp. domestic) or goat (Capra sp. domestic)
fragment of proximal end of right ulna.

Hare (Lepus capensis)

Left radius, lacking distal end. Proximal end fused.

Hare (Lepus capensis)

Left ulna, lacking distal end. Proximal end fused. Apparently
the same animal as the previous bone.

Goose (Anser sp. domestic)

Right carpometacarpus

L 81.9mm; g.b. prox. 19.0mm; max. width both shafts 9.9mm

Black Grouse (Lyrurus tetrix)

Left tibiotarsus

L 90.3mm; g.b. dist. 8.6mm; dist. depth 8.0mm

Though the blackcock is extinct in East Anglia today it was found
there until the nineteenth century.

819836 413 Layer 2

Haddock (Melanogrammus aeglefinus)

Percaudal vertebra.

Probably the same fish as 819840

819837 413 Layer 1

cf. Cod (Gadus morhua)

Caudal vertebra.

819838 403

Goose (Anser sp. domestic)

Phalanx 1 rear

Goose (Anser sp. domestic)

Left carpometacarpus, incomplete.

L 85.9mm

Domestic fowl (Gallus sp. domestic)

Left tibiotarsus, distal end.

Dist. b. 11.6mm; dist d. 11.4mm

Domestic fowl (Gallus sp. domestic)

Right tibiotarsus, fragment of proximal end.

Fish indet.

7 fin rays

819839
cf. Goose (Anser sp. domestic)
Fragment of sternum

819840
Pike (Esox lucius)
Vertebral centrum.

Haddock (Melanogrammus aeglefinus)
6 thoracic and precaudal vertebrae.
Probably the same fish as 819836

cf. Cod (Gadus morhua)
Otolith
