BIRD BONES FROM UPPER BUGLE STREET, SOUTHAMPTON

JENNIE COY

The following were identified for Southampton Archaeological Research Committee from Medieval levels of Upper Bugle Street excavated in 1973 by Mr A. Bratt. The bone report for this site is being written by Mrs Jennifer Bourdillon of S.A.R.C.

<u>code</u>	<u>element</u>	<u>species</u>	<u>comments</u>
UBS 73 A244	R ulna proximal	raven ... <u>Corvus corax</u>	cuts on shaft
UBS 73 A246	L femur		
UBS 73 A316	immature tibiotarsus	unidentifiable	
UBS II 73 C103	L furcula proximal	immature goose	} two geese are represented, one immature
"	" L ulna proximal	goose	
"	" 4 ribs	goose- size	
"	" phalanx I	? immature goose	
"	" radius - 3 fragments	immature goose	} 3 individuals
"	" R humerus distal	? immature domestic fowl	
"	" R ulna	? " " "	
"	" R ulna distal	? " " "	
"	" R radius	? " " "	
"	" L radius	? " " "	
"	" 2R tibiotarsus	? " " "	
"	" L tibiotarsus	? " " "	
"	" sternal fragment	mallard .. <u>Anas platyrhynchos</u> or domestic duck	
"	" L carpo-metacarpus	" " "	
"	" 2 unidentifiable bird fragments		
UBS II C136	R femur	? immature domestic fowl	
"	" L humerus	mallard or domestic duck	
"	" L ulna	? greenshank, <u>Tringa nebularia</u>	
"	" immature tibio-tarsus	unidentifiable	
UBS II 73 C142	phalanx I	? goose	
UBS 73 C151	L tarso-metatarsus	? immature domestic fowl	
"	" Cervical vertebra	? domestic fowl	
"	" Rib	domestic fowl size	
"	" L humerus	mallard or domestic duck	

<u>Code</u>	<u>element</u>	<u>species</u>	<u>comments</u>
UBS II 73 C151a	tibiotarsus	? goose	
" "	2 fragments furcula	domestic fowl	
" "	1 radius	? domestic fowl	
" "	3L ulna	domestic fowl	(3 ind)
UBS 73 C153	radius fragment	unidentified	
" "	tibiotarsus , immature	unidentified	
UBS II 73 C162	R proximal furcula	goose	

Notes

The goose fragments are all of a large species and there is no reason to suppose that they are other than domestic goose.
